

Omar Haddad

Senior DevOps / Platform Engineer

omar.haddad.demo@example.com | +961 70 112 233 | Beirut, LB | github.com/omarh

Professional Summary

DevOps engineer with 8 years building and scaling cloud-native platforms on AWS. Cut deployment lead time 70% by standardizing CI/CD and infrastructure-as-code across 40+ services. Deep Kubernetes operator, on-call leader, and advocate for observability-driven reliability.

Skills

Cloud: AWS (EKS, EC2, S3, IAM, Lambda), GCP **IaC:** Terraform, CloudFormation, Ansible **Containers:** Docker, Kubernetes, Helm **CI/CD:** GitHub Actions, Jenkins, ArgoCD **Observability:** Prometheus, Grafana, ELK, Datadog **Lang:** Python, Go, Bash

Experience

Senior DevOps Engineer — CloudScale MENA

2021 – Present

- Migrated 40+ microservices to EKS with Helm + ArgoCD GitOps, reaching 99.95% uptime.
- Authored Terraform modules adopted org-wide, cutting environment spin-up from 2 days to 20 minutes.
- Built Prometheus/Grafana SLO dashboards and alerting that reduced MTTR by 55%.
- Led blameless on-call rotation and incident reviews for a 12-engineer platform team.

DevOps Engineer — Beirut FinTech

2017 – 2021

- Designed Jenkins-to-GitHub-Actions CI/CD with automated canary releases.
- Containerized a legacy monolith and introduced blue/green deploys.
- Hardened AWS IAM and secrets management; passed first SOC2 audit.

Education

B.E. Computer & Communications Engineering — American University of Beirut (2016)

Certifications

- AWS Certified DevOps Engineer – Professional
- Certified Kubernetes Administrator (CKA)
- HashiCorp Terraform Associate
