

Maya Chedid

Senior Full-Stack Software Engineer

maya.chedid.demo@example.com | +961 70 909 121 | Beirut, LB | github.com/mayac

Professional Summary

Full-stack engineer with 7 years shipping production web apps at scale. Strong in TypeScript/React and Node, with solid system-design instincts. Led a team of 5, owned services handling 10M+ requests/day, and mentors through code review and design docs.

Skills

Frontend: React, TypeScript, Next.js, Redux **Backend:** Node.js, Python, REST, GraphQL **Data:** PostgreSQL, Redis, MongoDB **Infra:** Docker, AWS, CI/CD **Practices:** TDD, system design, Agile

Experience

Senior Software Engineer — Cedar Apps

2020 – Present

- Re-architected the checkout service to handle 10M+ requests/day at p99 < 120ms.
- Led migration of the frontend to React + TypeScript, cutting bug rate ~35%.
- Designed a GraphQL gateway unifying 6 backend services.
- Mentored 5 engineers; established the team's code-review and design-doc culture.

Software Engineer — StartHub

2017 – 2020

- Built core REST APIs in Node.js with PostgreSQL.
- Introduced automated testing (Jest) raising coverage from 20% to 80%.

Education

B.E. Computer Engineering — American University of Beirut (2017)

Certifications

- AWS Certified Developer – Associate
